

The graph displays two functions, $f(x)$ (blue line) and $g(x)$ (red line), on the interval $[0, 8]$. The y-axis ranges from 0 to 80. The function $f(x)$ is a straight line starting at $(0, 68)$ and ending at $(8, 0)$. The function $g(x)$ starts at $(0, 68)$, decreases to $(4, 37)$, remains constant at 37 until $x=5$, then decreases to $(6, 13)$, and finally reaches $(8, 0)$.

x	f(x)	g(x)
0	68	68
2	59	60
4	40	37
5	30	37
6	20	13
8	0	0
